

Customer information to REACH-Regulation

Regulation (EC) No.1907/2006 dd. 18.12.2006

Rötelmann GmbH is a manufacturer of products (ball valves) and does not produce substances or mixtures. According to clause 3, section 13 of the REACH regulation, Rötelmann GmbH is a downstream user and therefore not responsible for the registration of substances.

According to clause 33 of the REACH regulation, we are obliged to inform customers if a supplied product contains more than 0.1% of a substance on the SVHC candidate list for the authorization procedure. The SVHC candidate list is regularly expanded by the (ECHA) European Chemicals Agency and published on the website <https://echa.europa.eu/de/candidate-list-table>.

Lead (CAS no. 7439-92-1) has been added to the SVHC candidate list on 2018-06-27. In our products and single parts lead is used as an alloy component of machine steel (<0,35%), aluminum (<0,4%) and copper (<4%). The use of the SVHC substance lead is conform to actual regulations. There is no risk for health or environment, because the SVHC substance lead cannot be released from the alloy within the intended use of our products and parts.

Adding lead to the SVHC candidate list does not mean a prohibition. Furthermore the declaration is obliged according to clause 33 of the REACH regulation. We follow and evaluate changes on the SVHC candidate list regularly and are in constant contact with our suppliers.

We are happy to answer your questions regarding SVHC substances in specific products of Rötelmann GmbH at: info@roetelmann.de
