California Proposition 65

State of California Safe Drinking Water and Toxic Enforcement Act of 1986

The Act is an initiative of the State of California to address the growing concern about exposure to harmful chemicals. It is intended to ensure that no person, in the course of his or her business activities, knowingly and intentionally exposes an individual to chemicals known to the State of California to be carcinogenic or toxic to reproduction without first providing that individual with a clear and proportionate warning.

To implement the law, the State of California has published, among other things, a list of chemicals suspected of being carcinogenic or toxic to reproduction. The list currently contains more than 1,000 chemicals. Our products may contain listed substances such as lead >0.1% / <3%. However, the sale and use of the listed substances or products containing them is not prohibited by California Proposition 65. We would like to point out that you as a purchaser of our products may be subject to further obligations as a result of their use. The list as well as further information on California Proposition 65 can be found on the website of the California government (<https://www.p65warnings.ca.gov/>) and the California Office of Environmental Health Hazard Assessment (<https://oehha.ca.gov/proposition-65>).
